id	Instance name	Algorithm design	System	DOI / url
1	1_easy_existing_workflow	Algorithm design	A pathfinding algorithm in real-time strategy game based on Unity3D	https://doi.org/10.1109/ICALIP.2012.6376792
2	2_easy_existing_workflow	Healthcare processes	A review on artificial intelligence techniques in electrical drives: Neural networks, fuzzy logic, and genetic algorithm	https://doi.org/10.1109/SmartTechCon.2017.8358335
3	3_easy_existing_workflow	Development methodology	Activity Diagram for Hotel Room Booking	https://itsourcecode.com/uml/activity-diagram-for-hotel-room-booking/
4	4_easy_existing_workflow	Smart agriculture	Agile Methodologies Applied to the Development of Internet of Things (IoT)-Based Systems: A Review	https://doi.org/10.3390/s23020790
5	5_easy_existing_workflow	Business processes	Smart Agriculture Using IoT	http://dx.doi.org/10.13140/RG.2.2.17522.86726
6	6_easy_existing_workflow	Situational Awareness Systems	Analysis of Loan Application Process Using Process Mining	https://portal.so.ucr.ac.cr/sites/default/files/documents/2017_Analysis%20of%20Loan%20Application%20Process%20Using%20Process%20Mining.pdf
7	7_easy_existing_workflow	Smart agriculture	Assessment of shop floor layouts in the context of process plans with alternatives	https://doi.org/10.1590/0103-6513.20180078
8	8_easy_existing_workflow	Autonomous vehicles	Automated Smart Hydroponic System using Internet of Things	http://doi.org/10.11591/ijece.v10i6.pp6389-6398
9	9_easy_existing_workflow	Energy monitoring sensor network	Designing an Autonomous Vehicle Using Sensor Fusion Based on Path Planning and Deep Learning Algorithms	http://dx.doi.org/10.23919/SAIEE.2024.10551314
10	10_easy_existing_workflow	Business processes	Design and implementation of a microcontroller-based adjustable voltage automatic battery charger	http://dx.doi.org/10.4314/njt.v36i4.32
11	11_easy_existing_workflow	Business processes	Validation of business process models using swimlane diagrams	https://corescholar.libraries.wright.edu/infosys_scm/114/
12	12_easy_existing_workflow	Energy monitoring sensor network	Autonomous Car Implementation Based on CAN Bus Protocol for IoT Applications	http://dx.doi.org/10.1109/ICCES.2018.8639206
13	13_easy_existing_workflow	Energy monitoring sensor network	A smart IoT based system for monitoring and controlling the sub-station equipment	https://doi.org/10.1016/j.iot.2019.100085
14	14_easy_existing_workflow	Transportation	Lifetime Modelling of Lead Acid Batteries	https://www.researchgate.net/publication/246687286_Lifetime_Modelling_of_Lead_Acid_Batteries
15	15_easy_existing_workflow	Energy monitoring sensor network	A decentralized approach to formation flight routing of long-haul commercial flights	https://doi.org/10.1177/0954410018791068
16	16_easy_existing_workflow	Robot control diagram	Reducing energy vulnerability based on energy services in the residential homes	http://dx.doi.org/10.1007/s12667-023-00610-2
17	17_easy_existing_workflow	Robotic process automation	Development of a vacuum cleaner robot	https://doi.org/10.1016/j.aej.2018.07.005
18	18_easy_existing_workflow	Vital signs measurement	Development of Robotic Process Automation for Scraping Prospective Customer Data and Implementation Haversine in PT. XYZ	https://doi.org/10.25126/jitecs.202381434
19	19_easy_existing_workflow	Vital signs measurement	Digital Triage Assistant	https://cs.felk.cvut.cz/en/page/digital-triage-assistant
20	20_easy_existing_workflow	Vital signs measurement	Digital Triage Assistant	https://cs.felk.cvut.cz/en/page/digital-triage-assistant
21	21_easy_existing_workflow	Vital signs measurement	Digital Triage Assistant	https://cs.felk.cvut.cz/en/page/digital-triage-assistant
22	22_easy_existing_workflow	Transportation	Digital Triage Assistant	https://cs.felk.cvut.cz/en/page/digital-triage-assistant
23	23_easy_existing_workflow	Energy monitoring sensor network	Configuration Study of Electric Helicopters for Urban Air Mobility	https://doi.org/10.3390/aerospace8020054
24	24_easy_existing_workflow	Smart city	IoT based real time energy monitoring system using Raspberry Pi	https://doi.org/10.1016/j.iot.2020.100292
25	25_easy_existing_workflow	Measuring of environmental parameters	IoT Based System for Monitoring and Control of Gas Leaking	https://doi.org/10.1109/ICITAMEE50454.2020.9398384
26	26_easy_existing_workflow	Business processes	IoT Based System for Monitoring and Control of Gas Leaking	https://doi.org/10.1109/ICITAMEE50454.2020.9398384
27	27_easy_existing_workflow	Home automation	Guided Reasoning of Complex E-Business Process with Business Bug Patterns	https://doi.org/10.1109/ICEBE.2006.54
28	28_easy_existing_workflow	Cyber-security	Implementation and Analysis of an IoT-Based Home Automation Framework	https://doi.org/10.4236/jcc.2021.93011
29	29_easy_existing_workflow	IoT Framework	IoT Multi-Vector Cyberattack Detection Based on Machine Learning Algorithms: Traffic Features Analysis, Experiments, and Efficiency	https://doi.org/10.3390/a15070239
30	30_easy_existing_workflow	Smart agriculture	Software-Defined Dew, Roof, Fog and Cloud (SD-DRFC) Framework for IoT Ecosystem: The Journey, Novel Framework Architecture, Simulation, and Use Cases	https://doi.org/10.1007/s42979-021-00521-y
31	31_easy_existing_workflow	Smart city	Cost Effective Smart Hydroponic Monitoring and Controlling System Using IoT	http://dx.doi.org/10.4236/ica.2019.104010
32	32_easy_existing_workflow	Smart city	Smart Garbage Segregator and IoT Based Waste Collection system	https://doi.org/10.1109/ICACITE51222.2021.9404692
33	33_easy_existing_workflow	IoT for human safety	Smart Garbage Segregator and IoT Based Waste Collection system	https://doi.org/10.1109/ICACITE51222.2021.9404692
34	34_easy_existing_workflow	IoT for human safety	An IoT-Based Mobile System for Safety Monitoring of Lone Workers	https://doi.org/10.3390/iot2030024

35	35_easy_existing_workflow	Measuring of environmental parameters	An IoT-Based Mobile System for Safety Monitoring of Lone Workers	https://doi.org/10.3390/iot2030024
36	36_easy_existing_workflow	Home automation	Data-driven iot-based water quality monitoring and potability classification system in rural areas	https://doi.org/10.1109/ICTC49870.2020.9289512
37	37_easy_existing_workflow	Smart agriculture	Internet of Things-Based Intelligent Smart Home Control System	https://doi.org/10.1155/2021/9928254
38	38_easy_existing_workflow	Home automation	Smart irrigation system for environmental sustainability in Africa: An Internet of Everything (IoE) approach	https://doi.org/10.3934/mbe.2019273
39	39_easy_existing_workflow	Home automation	LoRa and Server Based Home Automation using the Internet of Things	https://doi.org/10.1016/j.jksuci.2020.12.020
